## Agenda?

- In the spotlight?
- New references?
- New applications?
  - ? Air, oil, fuel, diesel filters? ?
  - ? Cabin filters?
- Change of status?
  - ? Filters available whilst stock last?
  - ? Superseded filters?
  - ? Abandoned filters

## ? ? ? In the Spotlight PIC April 2014?

Dear customers,

This new edition of our quarterly news bulletin, close to the arrival of spring, is the ideal opportunity to speak to you about reduction of emissions.

We are proud to let you know about the launch of the new 2.0 Blue HDI engine from PSA, which conforms with Euro VI emissions standards, and on which Sogefi filters are fitted.

This DW10F engine, which offers from 135HP up to 180HP and will equip many vehicles like Citroën C4 Picasso, DS3, DS4, Peugeot 308 II and RCZ, is anticipated to meet the Euro 6 standard. This new rule imposes a strict reduction on the nitrogen oxide emissions (NOx); achieved by the Selective Catalytic Reduction (SCR) pollutant-reducing system that is well-known on trucks, but up to now has been very rare on light vehicles.

The Sogefi Group has been named as an exclusive tier one supplier of key components for the new PSA Euro 6 compliant diesel engines. According to the vehicle type, Sogefi will be the original filtration equipment provider for air, oil and especially fuel, using a brand new diesel filtration module.

This module delivers an exceptionally high filtration, capturing almost all particles bigger than 4µm. This meets the demanding levels of protection needed by the latest generations of Diesel Fuel and Common Rail injectors, ensuring compliance with imminent Euro 6 regulations.

The filter body is made entirely of weight-saving plastic and contains a Sogefi designed 'E-TECH' pleated filter element. This exclusive pleating technology saves space and weight on the vehicle. The 'E-TECH' element has been developed to avoid clogging by diesel fuels, including Biodiesel (B30), available in different geographic locations. It employs Sogefi's 'D-TECH' technology, which protects the Injection System against water droplets in fuel. It captures almost any water droplets bigger than 20µm, and maintains performance over time.

Both the oil filter and diesel filter modules have been positioned to facilitate servicing. By making the oil filter about 20% smaller and lighter than the previous design it has been more easily integrated into the engine. Likewise, the positioning of the diesel filter makes it easy to drain water from the top for ease of servicing.

This new Diesel filter will soon enhance the Coopersfiaam brand under the reference CoopersFiaam FA6130ECO.
