Agenda

- In the spotlight
- New references
- New applications
 - Air, oil, fuel, diesel filters
 - Cabin filters
- Change of status
 - Filters available whilst stock last
 - Superseded filters
 - Abandoned filters

In the Spotlight PIC January 2014

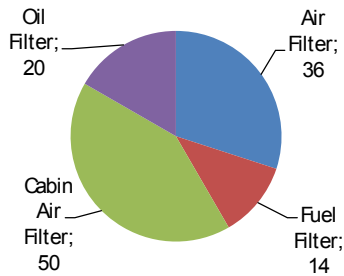

First, allow us to present our best wishes of health and success for this New Year 2014.

Along the past years our group, Sogefi, went through important changes into its organization and investment to sustain its future.

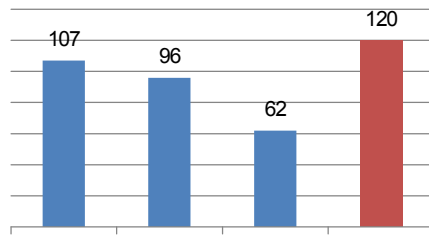

In 2013, important milestones were achieved with the start-up of SAP for instance or the rise in power of Sogefi Pro our new brand for Heavy Duty applications.

In this way and despite a tough economical context and a very competitive environment, the company succeed to gain new customers and improved overall the satisfaction of its dients.

As a very concrete example of customer asset, the company succeeded to break its own record of new part introduction with a total list of 120 parts numbers for light vehicles. As you can see from the illustrated breakdown, if the majority was made of cabin air filters, the category of Air filters follows just behind.

Breakdown of new parts

Benchmark vs competitors

We have found also interesting to benchmark this number against our 3 main competitors originated from Germany (see also illustration). We did this by looking at their new parts introduced in Tecdoc along the last 12 months.

Again in all cases, COOPERSFLAAM remain the undisputed leader for new product introduction giving to our customer "?? best market ??????".

This is yet another good reason to wish you again a very good year 2014, full of successful business and accomplishments.

Your product marketing team.
